

Arts & Design

1. Create a mural for your school/community.
2. Design a series of posters for social causes.
3. Develop an original short animated film.
4. Design a clothing line inspired by nature.
5. Create a photography portfolio of urban landscapes.
6. Compose an original song or album.
7. Design and build your own website.
8. Create a comic book series with original characters.
9. Illustrate a children's book.
10. Design a video game with simple mechanics.
11. Create a documentary on local history.
12. Design a sustainable fashion collection.
13. Create a digital portfolio of original artwork.
14. Write and direct a short play.
15. Create a podcast on a specific social issue.
16. Design a mobile app for student organization.
17. Create a stop-motion animation.
18. Design and create a set of jewelry pieces.
19. Create a photography series exploring cultural diversity.
20. Develop a short graphic novel about environmental issues.

Science & Technology

21. Build a model rocket and document the process.
22. Design a simple robot to solve everyday problems.
23. Create a website or app that promotes mental health.
24. Investigate renewable energy sources and build a prototype.
25. Study and improve the efficiency of solar panels.
26. Design and 3D print a prototype for a new invention.
27. Create a sustainable water filtration system.
28. Build a basic home automation system.
29. Design a device to help the visually impaired.
30. Develop an app to track your daily carbon footprint.
31. Study the effects of different fertilizers on plant growth.
32. Create a video explaining complex scientific concepts.
33. Investigate how different materials affect sound insulation.
34. Build a working wind turbine model.
35. Study how video games affect cognitive skills.
36. Develop a robot that can perform simple tasks.
37. Study and report on the benefits of electric vehicles.
38. Build a water-powered clock.

39. Research and develop a new type of smartphone case.
40. Create a guide on reducing household waste through technology.

Social Studies & Global Issues

41. Create a campaign to promote equality in education.
42. Develop a documentary on the impact of climate change in your region.
43. Study the impact of immigration on local culture.
44. Research and present on the effects of social media on teenagers.
45. Develop a podcast that highlights human rights issues.
46. Study the effects of urbanization on local ecosystems.
47. Create a guide for students to learn about mental health awareness.
48. Research how cultural festivals contribute to social cohesion.
49. Develop a local food bank initiative and document its impact.
50. Study the role of women in leadership throughout history.
51. Research the history and impact of a particular social movement.
52. Develop a community project to clean up local parks.
53. Create a guide for sustainable tourism in your area.
54. Research the benefits of inclusive education.
55. Study the impact of global pandemics on local economies.
56. Create a social media campaign on gender equality.
57. Research and present the importance of fair trade practices.
58. Study how historical events have shaped your country's current policies.
59. Create a guidebook on youth activism and social change.
60. Research and present the importance of cultural preservation.

Health & Well-being

61. Create a fitness app for teenagers.
62. Research the effects of screen time on sleep patterns.
63. Develop a healthy eating guide for your school.
64. Create a campaign to promote physical fitness in your community.
65. Study the impact of diet on mental health.
66. Develop a mindfulness program for students.
67. Research how different types of exercise impact heart health.
68. Create a video series on stress management techniques.
69. Study the effects of meditation on focus and productivity.
70. Develop a sleep hygiene guide for teens.
71. Research and present the benefits of plant-based diets.
72. Create a campaign to raise awareness about mental health issues.
73. Develop a fitness challenge for your peers.
74. Study the impact of fast food on health.
75. Create a guide on balancing academics and extracurricular activities.
76. Research how hydration affects cognitive performance.

77. Develop a series of recipes for healthy, low-budget meals.
78. Study the effects of music on mental health.
79. Create a guide on managing stress during exams.
80. Research and present on the benefits of outdoor activities for mental well-being.

Environment & Sustainability

81. Create a school recycling program.
82. Study the effects of plastic pollution in local waterways.
83. Build a vertical garden to promote urban farming.
84. Research and create a guide on sustainable living practices.
85. Design a product made from recycled materials.
86. Create a documentary on local wildlife preservation efforts.
87. Research and present on the importance of rainwater harvesting.
88. Develop a community composting project.
89. Study how local businesses can reduce their environmental impact.
90. Create an art project using only recycled materials.
91. Research and propose solutions for reducing air pollution in your city.
92. Develop a guide for reducing household energy consumption.
93. Study the impact of deforestation on global biodiversity.
94. Create a campaign to reduce single-use plastics in your school.
95. Research and develop a plan for urban green spaces.
96. Study the effects of climate change on local agriculture.
97. Create a guide on reducing water usage in homes.
98. Research the benefits of sustainable agriculture practices.
99. Develop a project to promote tree planting in urban areas.
100. Study how climate change is affecting endangered species.

Business & Economics

101. Start a small business and document the process.
102. Research the effects of advertising on consumer behavior.
103. Create a business plan for a startup idea.
104. Study the economics of sustainable farming practices.
105. Develop a guide on financial literacy for teenagers.
106. Research how social media impacts marketing strategies.
107. Create a product and sell it to raise money for charity.
108. Study the importance of ethical business practices.
109. Develop a marketing campaign for a local business.
110. Research the role of entrepreneurship in economic development.
111. Create an investment guide for young people.
112. Study the effects of globalization on local businesses.
113. Develop a project to promote fair trade in your community.
114. Create a series of infographics about personal finance.

115. Research how different countries manage their economies.
116. Develop a campaign to raise awareness about consumer rights.
117. Study the impact of e-commerce on traditional retail.
118. Create a guide on budgeting and saving for teenagers.
119. Research and present the effects of inflation on daily life.
120. Develop a project on the role of microfinance in reducing poverty.

Technology & Innovation

121. Build a website that helps students learn a new skill.
122. Design a simple AI chatbot to answer common questions.
123. Develop an app for organizing student activities.
124. Research the impact of technology on education.
125. Build a drone to perform simple tasks.
126. Create a digital art portfolio using graphic design software.
127. Develop a system to track and reduce electricity usage at home.
128. Research and present on the evolution of smartphones.
129. Build a simple circuit board and explain how it works.
130. Create a virtual tour of your school using VR technology.
131. Study how artificial intelligence is impacting the workforce.
132. Develop a project that teaches coding to younger students.
133. Research the effects of video game design on behavior.
134. Build a 3D model of a historical landmark using software.
135. Create a video series explaining the basics of computer programming.
136. Research the future of renewable energy technology.
137. Develop a smart home system using basic programming.
138. Study the role of robotics in modern medicine.
139. Create a game that helps kids learn math or science.
140. Research and present the impact of automation on jobs.

Community & Service

141. Organize a community clean-up event.
142. Develop a program to teach younger kids a specific skill.
143. Create a project to raise awareness for a local charity.
144. Study the impact of volunteering on community well-being.
145. Develop a mentoring program for younger students.
146. Create a social media campaign to promote kindness.
147. Organize a food drive for local shelters.
148. Study the impact of homelessness in your community.
149. Create a guide for students on how to get involved in volunteer work.
150. Develop a program to help seniors learn technology skills.
151. Create a project to support animal shelters.
152. Research and present on the importance of community gardens.

153. Organize a charity event to raise money for a cause.
154. Create a program to promote literacy in your community.
155. Study the effects of poverty on education in your region.
156. Develop a project to support refugee integration.
157. Create a guide for organizing successful community events.
158. Study the impact of after-school programs on student success.
159. Develop a project to promote healthy living in your community.
160. Organize a cultural exchange event in your school.

Language & Literature

161. Write a novel or short story collection.
162. Translate a book from one language to another.
163. Create a blog focused on literature or creative writing.
164. Study the impact of a specific author on modern literature.
165. Write and perform a spoken word poem.
166. Create a project comparing different literary traditions.
167. Study how language impacts social interactions.
168. Write a screenplay for a short film.
169. Create a poetry anthology focusing on a specific theme.
170. Research the role of storytelling in indigenous cultures.
171. Write a series of essays on social justice issues.
172. Create a guide for writing better essays.
173. Study the evolution of a particular genre of literature.
174. Write a series of letters from the perspective of a historical figure.
175. Create a project analyzing the symbolism in a particular work of literature.
176. Study how language learning impacts cognitive development.
177. Write and illustrate a children's book in multiple languages.
178. Research how social media is changing communication.
179. Create a guide to help students learn a new language.
180. Study the impact of literature on social change.

Sports & Physical Education

181. Create a fitness program for your peers.
182. Research the effects of exercise on mental health.
183. Develop a project that promotes inclusive sports in your school.
184. Study the impact of nutrition on athletic performance.
185. Create a guide to training for a specific sport.
186. Research how technology is changing sports training.
187. Develop a campaign to encourage physical activity in your community.
188. Study the history and impact of the Olympics.
189. Create a fitness challenge for your school.
190. Research the effects of team sports on social skills.

191. Develop a guide on preventing sports injuries.
192. Study the role of sports in different cultures.
193. Create a video series on mastering basic sports techniques.
194. Research how athletes manage stress and pressure.
195. Develop a program to promote mental health through physical activity.
196. Study the impact of physical activity on academic performance.
197. Create a guide to different types of yoga and their benefits.
198. Research how climate change is affecting sports events.
199. Develop a project to encourage women's participation in sports.
200. Study the impact of sports on community building.
