What is a Tombstone Project?

A Tombstone Project is an educational assignment where students create a fictional tombstone or monument that commemorates a person, event, or idea. This creative project encourages students to delve into various subjects, such as history, literature, science, and art. By designing a tombstone, students must research their topic, distill information into a concise format, and express their findings artistically.

These projects often include key elements like dates, epitaphs, and images. The format allows for personal expression while emphasizing the importance of the subject matter. In essence, a Tombstone Project is more than just an art project; it's a gateway to exploring life stories and broader themes.
